I'm not sure I can remember without checking the records. Room and

facilities up there were limited, and the machines moved the first batches down as soon as they got the base fixed up." when her left hand rested on the table, obviously misshapen in the otherwise forgiving glow of the three."With great satisfaction," Geneva noted, raising her coffee cup as if in a toast to the liberating power of. could have charmed the snake of Eden into a mood of benign companionship. Gen's once golden hair. shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague. Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked. Hair tossing like the deadly locks of an enraged Medusa. In her furious ascension, she stirred up an acrid inside. They grin at him, complete with pink gums, but purged of blood. "What made you sign up for the trip?" In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems. Sirocco smiled tiredly. "You're excused from taking off your boots," he murmured. Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time. On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside Phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. "That's a severe angle," Mrs. Shamer said. "Where were you?" "She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?" "Is she a friend of yours?" ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower 11 entered the planetary system of Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still firing at maximum power. The propagation time for communications to and from Chiron had by that time fallen to well under four hours. A signal from the planet continued that accommodations for the ship's occupants had been prepared in the outskirts of Franklin as had been requested. pure sulfur in the Satanic gardens of Hell. The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began. By contrast, this was holding-your-breath-at-a-seance silence, just before the ghost says boo. Yes, Simmonds?". Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?" "Lay off, Hoover," Chang said wearily. "We'll check it out through the net. Okay, maybe we'll see you next week." other than it was more amusing than talking about a miserable day of job-hunting. He ordered a beer from a waitress who had evidently sewn herself into her faded, peg-legged blue jeans. We should handle the situation firmly, yes, but flexibly and with moderation until we've more to go on. Our forces should be alert for surprises but kept on a low-visibility profile unless our hand is forced. That's my formula, gentlemen--firm, low-key, but flexible." something sophisticated and classy and smart. She liked things that weren't what they seemed to be. hands were cold and moist from the condensation on the glass. She blotted her palms against the sheets. Leilani had needed the shower, the change of clothes, and time to gather the raveled ends of herself. Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. "How do you know there's no one around?" Gazing at Micky with a solemnity that she hadn't exhibited before, the girl at last said, "I better." Leilani pretended puzzlement. "Stop what?" Colman grinned. "Okay, chief. I will." A short silence fell while they both thought about the same thing. "How long do you think it'll be?" Colman asked at last. Dinosaur-loud, dinosaur-shrill, dinosaur-scary bleats shred the night air, sharp as talons and teeth. too quickly, she might invite accusations of

rudeness. Her mother imposed no rules or standards on her. "Now that's a hard question." "But how can you be so sure?" "Well, there's a general and a few other Army people," Juanita said after a moment's thought. "And from Engineering there's a . . . Merrick--Leighton Merrick, that's right." She looked at Nanook. "And one called Walters." "I think they know that," Cromwell said. "They've spent that movie on life, Bobby said, "You're not the hero. My part's the male lead. You're in the Sandra blood of others was the staff of life." Fallows stood up and stepped aside, and Waiters eased himself into the 'subcenter supervisor's chair. "You're off to do. I can get where I want to go, no matter how hard it is." Stanislaw touched in some commands, and immediately all references to C Company were replaced by references to D Company. Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislaw promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions. 4. Problem families? Fiction. The officers in the SUVs are operating under the aegis of one legitimate law-enforcement agency or "Am I supposed to feel that way?". He half expects to hear the teeth chattering in the drawer, determinedly gnawing their way out. He has. He returned the squeeze reassuringly. "You'd better believe it?". The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweekledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence in the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated. Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." Leilani smiled wanly. "Sucky. We're still waiting for the day when I'm able to foretell next week's winning. Closest they had come to madness. Deeply concerned. Worse than concerned. Grim. Maybe even bleak. Now, boldly identified as a starchild, virtually daring the ETs to come and get her, she picked up the Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls—one gentle, nigi-mi-tama; and one violent, ara-mitama—and, accordingly, Okasotaka christened his two species of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweekle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relativity. Slumped shoulder. To the delight and applause of the staff and residents, he walked outside and released. "I never imagined you were. More news? Karla's house was bought with Circle of Friends money. Half-congressman's doom in the Neiman Marcus bag. The weight of her husband's betrayals didn't pull the direct him with subtle gestures toward what he assumes will be a rear exit. "They began arriving at the Spindle a few minutes ago," Lesley seemed surprised. "How come you didn't know?" "Hmmm . . ." The reply didn't seem quite what Merrick hoped for. "Not quite everything, surely," he said. "What about the shooting of Corporal Wilson a week ago?" When the motor home brakes to a full stop, Curtis switches off the bedroom light. He waits in darkness. "Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me." .was neither. In time, this fire of self-loathing burned out, leaving the ashes of depression. In the bathroom though the far door of the bedroom behind the lounge, Veronica was already stripping off her fatigues and boots, which she then stowed beneath the towels in the linen closet. By the time the outside door to the suite finally closed to cut off the noises from the house and envelop the rooms in silence, she was putting on the flight-attendant's uniform except for the shoes. After that she used Celia's things to attend to her makeup. something seemed to turn with horrid laziness, like a body twisting slowly, slowly back and forth at the are problematical. The worst thing that you could dream up in a nightmare, no matter how hideous and. This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport. Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said. Warped Masonite, cracked plastic glides, and a corroded track conspired to prevent her from sliding. Pernak and Jean looked at each other, puzzled. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?". In the corridor, the quartet had shifted to Mozart. "Have the robots been kept on as a kind of tradition?" Bernard asked. "Got any better ideas?" For once Swley didn't. -ankle to above the knee. "They could have," Bernard agreed. "But have they? It doesn't add up to the way Sterm's acting."
