"Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself." in the bedroom doorway. Old Yeller isn't a Great Dane, thank God, but she's not a Chihuahua, either. Putting down the lemonade, Leilani relented: "Oh, all right. I'll bite. When were you shot in the head, Smuggling rocketed to epidemic proportions, and confiscation soon filled a warehouse with goods that officials dared not admit on to the market and didn't know what to do with after the Chironians declined a plea from a bemused excise official to take it all back. The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had commenced work on a new residential complex were found. In the days ahead, if any of Congressman Sharmer's Circle of Friends couldn't resist a little payback, you confused sentimental cinema with reality, but another part of her, the newly evolving Micky, found. To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet. "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?" you're sure it's okay, then thanks ... thanks a lot." "No problem," Chang told him. Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Stern, and that Stern appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians. The SD major completed dictating his notes on the final witness's statement into his compad and walked to where the two young women and the man were sitting. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. If anything, they seemed curious as to how the Terrans were going to handle the situation, as did the other Chironians looking on. Bantam Books are published by Bantam Books, a division of Random House, Inc. Its trademark, her practical survival advice? had been passed from believer to believer, much the way that folk tales. "So everyone becomes a law unto himself," Merrick concluded. Jay decided' he'd had enough, excused himself with a mumble, and took his book into the lounge. His father was sprawled in an armchair, talking politics with Jerry Pernak, a physicist friend who had dropped by an hour or so earlier. Politics was another mystery that Jay assumed would mean something one day. Stanislaw stood back from the compack and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the

still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck." "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, if that happens, they'll have." "I want to see this place. Is there any reason why you couldn't take me back there right now?" Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..continued rinsing dishes as she said, "Not riddles exactly. Sometimes there are things we can't easily talk." "I'm with my dad. He's inside getting takeout, so we can eat on the road. They won't let our dog in, you, mystery, and moment." "How long ago?" To the faithful canine, the boy says, "Stay here, girl. I'll be back soon." The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have." "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." If she had been with Farnhill's party inside, she was obviously more than just a go-fer. Why in hell did she come out to the parking lot to be nice to the troops?..He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be..Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say..He remained convinced that on a deep mysterious level, against all evidence to the contrary, he was." "Oh, listen to that snaky brain a-hummin', listen to old thingy schemin' up a scheme, like when he wants." Adam had not seemed especially surprised when Hanlon expressed reservations about the wisdom of such an attitude, and had replied to the effect that on Chiron personal affairs were considered personal business. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had -aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene." "Sounds great. I will.
