No one would ever be sure if samples in the future were real Martian plants or mutated Earth stock." The truth, senior. This one you call Nina? this girl? is not a ghi. She is of the ancient race from the high peaks, where the great serpents dwell. Your workers here, even Moises, know only the jungle, but I come from the great valley beneath the mountains, and as a child I learned to fear those who lurk above. We do not go there, but sometimes the snake-people come to us. In the spring when they awaken, they shed their skins, and for a time they are fresh and clean before the scales grow again. It is then that they come, to mate with men." "That light-hearted body, the Bach Choir, has had what I may befittingly call another shy at the Mass in B minor." (George Ber... was a unicorn. Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship's computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected. "These are what I need," said Amos, putting on the clothes quickly, for he was beginning to get chilly standing in his underwear. Then he climbed over the edge of the boat into the swamp. He was so bright and colorful that nobody saw the figure hi dirty rags run quickly behind them to the far end of the ship and also climb over into the swamp. Had the figure been Amos? it was wearing Amos' rags? the red hair might have attracted some attention, but Jack's hair, for all his colorful costume, was a very ordinary brown. Crawford was proud that she had chosen him for her companion when she could no longer. Dramatization is another. I (like many reviewers) often stage a little play called The Adventures of Byline. Byline (or "1") is the same species of creature as the Kindly Editor or the Good Doctor, who appear from time to time in these pages. That is, she is a form of shorthand. When Byline rewrites story X, that doesn't mean that I? the real, historical personage? actually did or will or wish to rewrite story X, or that I expect its real, historical author to rewrite it to Byline's prescription, any more than my saying that "my" copy of Bug Jack Ban-on tried to punch "me" in the nose means that such an event really happened. Pauline Kael's Movie Loon is another such fiction; these little creatures we send scurrying about the page are not our real, live selves, and their exploits are dictated more by the exigencies of our form than by a desire for personal glory. a red light flashing, but she quickly saw it was not the worst it could be; the pressure light still glowed.
